

CHARGE-TO-MOBILE PAYMENTS

Phonovation in conjunction with the main mobile networks have developed an SMS payment mechanism called M-Charge which allows users to securely pay for services via their mobile phone.

The mobile user is then charged to their mobile phone bill, or if they are pre pay customers, debited directly from their mobile phone credit.

Phonovation's Mobile Payments solution can be used by online merchants and in general services such as refuse collection, taxi fares, toll roads, parking, amongst many other services.

Visit www.mcharge.ie for more.

Phonovation is Ireland's largest Automated Voice and Business SMS solutions provider.
